Subject: East Carbon Development Corporation (ECDC)

I talked with Ralph Bonn of the Utah Division of Solid and Hazardous Waste and got more information about ECDC. The following is a revised paragraph on ECDC based on this information:

Status of the East Carbon Development Corporation (ECDC) site:
I talked with Terry Brown ((303) 312-6419) who is the Off-Site Coordinator for RCRA in Region 8. I also talked with Mike McCeney ((303) 312-7023) an RPM in the Region 8 Superfund program and Ralph Bonn of the Utah Division of Solid and Hazardous Waste. Region 8 does send Superfund, non-RCRA waste to this landfill, which has a double liner on the bottom and a single liner on the sides. There are no known instances of violations of regs governing hazardous wastes. The facility is within the boundaries of the town of East Carbon, but the nearest residence is about a mile from the facility perimeter. East Carbon is primarily caucasian and low income, consisting mostly of miners out of work since the local mines have closed. The population of East Carbon is in general highly supportive of ECDC since it provides most of the town's jobs.
